

Whether treating yourself, or acting as a caregiver for a loved one, keep the focus on quality care by using hospital-quality products at home.

Reducing hospital re-admissions is critical to the health of you or your loved ones.¹

Each year,
46.1 MILLION
inpatient and outpatient
surgical procedures take place²
so proper post-hospital care
is critical to avoid re-admission.

35.1 million patients are discharged from the hospital each year.²

65%
of those patients
are discharged home.³

1 in 5 patients
are re-admitted within
30 days of discharge.³

Caregivers' responsibilities are increasing as more adults with chronic conditions and disabilities are living at home than ever before.⁴

Nearly
40 MILLION AMERICANS
provide unpaid
care to an adult.⁵

On average, they provide

of care weekly.⁵

In the next few decades, the demand for family caregivers is expected to **rise by 85%.**⁶

Access to the same quality products used in hospitals may positively impact quality of life for you or the loved ones you care for.

NEARLY 46%

of caregivers who provide complex chronic care **perform medical and nursing tasks.**⁷

When asked which care tasks were most difficult, caregivers said:⁷

Help with assistive devices for mobility (e.g. canes, walkers)

43%

Wound care

35%

Incontinence equipment, supplies, administer enemas

25%

Operate durable medical equipment (e.g. wheelchairs, toilet, or bath chairs)

21%

With rising healthcare costs,⁸ you and your loved ones may be looking for effective and cost-efficient ways to provide quality care at home.
